

Venue Solution Overview

Ruckus Managed Networks

Features

- Simple onboarding / No hassle connectivity
- Separate private and guest networks
- Both wired and wireless networks
- Customizable branded portals
- Optimal guest experience
- Reliable and Scalable
- Monetization tools
- 24/7 support

Service Overview

RUCKUS Managed Networks (RMN) works with Service Providers to extend their network platform to serve venue owners and operators with robust wired/wireless network solutions.

Consumers want Wi-Fi everywhere! Theaters, stadiums and racetracks are no exception. From concerts to ball games, connectivity is a “must have” for venues.

The range of events now being held in today's arenas- from basketball games to home shows, and from political conventions to Monster Truck rallies- drives a variety of connected activities: researching statistics, engaging on social media, uploading videos, sending pictures and instant messaging, to name a few. All have one thing in common: the need for a fast, reliable, massively scalable Internet connection. For arena owners and Service Providers, this creates an opportunity to offer high-quality connectivity as a means of enhancing the customer's experience and building a loyal fan base all their own. Delivering high quality, reliable Wi-Fi experience in a venue- and doing it cost effectively- requires thorough research and planning, sound network design and expert installation practices. By factoring the unique building, network, service, spectrum, construction and business dynamics of the arena into Wi-Fi design and deployment, venue owners and Service Providers can deliver a high-performance networked experience to event attendees. This means providing access to every guest who wants to use the network, even when an event draws tens of thousands.

The same high-quality network provides secure connectivity for venue operations including concessions and artist/team/event communications. Monetization capabilities of the system also drive revenue opportunities for the venue and its direct customers

Available Professional Services
