

NETWORK AUDIT AND ASSESSMENT SERVICES

The first step in preparing for DOCSIS 3.1®

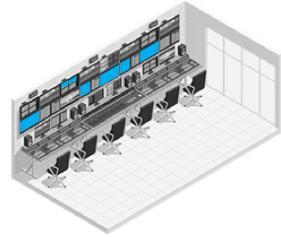

Is your network ready for DOCSIS 3.1 so you can deliver the immersive experiences that your subscribers want? CommScope Network Audit and Assessment Services can help you prepare for the transformation. We start by reviewing your short and long-term service goals, expectations and capacity requirements. Then we evaluate all six critical areas of your network using custom tailored tools and time-tested processes to identify the changes and upgrades needed for you to be ready for DOCSIS 3.1. CommScope brings decades of network consulting experience to service providers across the world, and we're ready to put our knowledge to work for you.

MAKING NETWORK EVOLUTION SIMPLE

To help prepare you for the journey to DOCSIS 3.1, we provide you with an easy-to-read executive scorecard that details any network improvements that need to be made. Here's an example:

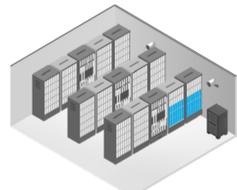

DOCSIS 3.1 Readiness scorecard

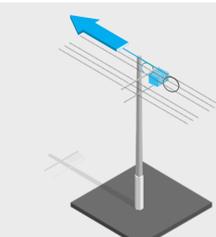

OSSI BACK OFFICE
Network monitoring, Modem Maintenance and Authentication systems require replacement or upgrade. 17 other back office systems are DOCSIS 3.1 ready.

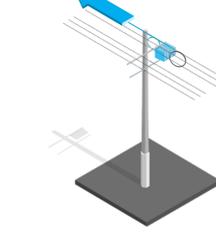

CORE BACKHAUL TRANSPORT
Sufficient bandwidth, port availability and physical capacity to support DOCSIS 3.1.

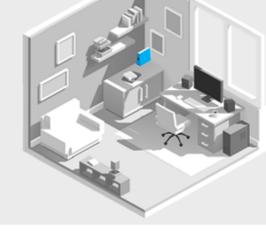

CMTS CCAP
CMTS and IP Video systems are DOCSIS 3.1 ready.

DOWNSTREAM NETWORK
2 OFDM channels require channel realignment. No downstream RF issues observed.

UPSTREAM NETWORK
Ingress below 22 MHz. Node +6 architecture not optimized for 3.1.

CPE HOME
No DOCSIS 3.1 capable devices currently deployed.
