RUCKUS® SZ/vSZ Controller to R1 Migration Service

Offered by RUCKUS Professional Services

Virtual SmartZone

SmartZone
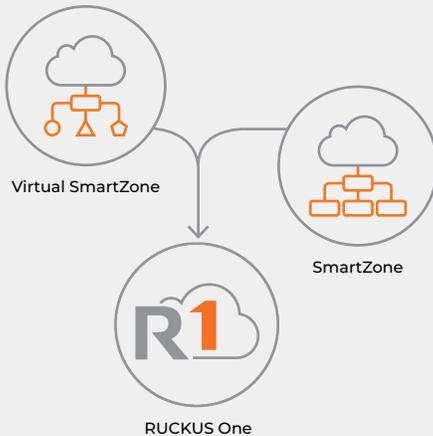

RUCKUS One

BENEFITS

- Accelerates migration from SmartZone or vSmartZone to RUCKUS One by leveraging a structured migration approach that minimizes operational disruption and shortens transition timelines.

- Reduces migration risk through the use of RUCKUS-developed tools, best-practice methodologies, and experienced engineers who understand both SmartZone and RUCKUS One architectures.

- Ensures feature compatibility and validated configuration replication by reviewing existing SmartZone configurations and translating them appropriately into the RUCKUS One environment.

- Provides expert guidance through planning, migration, and validation phases, ensuring prerequisites are met and the new RUCKUS One deployment operates as expected.

- Enables faster adoption of the RUCKUS One cloud management platform, allowing organizations to benefit from centralized management, improved visibility, and modern operational capabilities.

FIND OUT MORE

Each controller migration environment is unique. RUCKUS Professional Services offers three standardized migration tiers designed to accommodate common SmartZone and vSmartZone deployment sizes.

If your environment falls outside these tiers, we can work with you to develop a custom migration engagement tailored to your network requirements.

For more information, please contact your **RUCKUS Account Manager** or **Sales System Engineer**, or submit an inquiry through the RUCKUS Professional Services Portal at this link.

REALIZE A MODERN CLOUD-MANAGED NETWORK

Your network has grown, and you are ready to transition from SmartZone (SZ) or Virtual SmartZone (vSZ) to the RUCKUS One cloud platform. Back up that important decision with the expertise of RUCKUS Professional Services.

Migrating from SmartZone to RUCKUS One enables centralized operations, improved visibility, and modern cloud-managed networking capabilities. A successful migration requires careful planning, feature compatibility validation, configuration replication, and controlled access point migration.

RUCKUS Professional Services provides the expertise and proven methodology to help organizations efficiently migrate their SmartZone or vSmartZone environments to RUCKUS One, minimizing operational disruption and accelerating adoption of the RUCKUS One platform.

PROVEN METHODOLOGY

RUCKUS Professional Services applies proven migration processes developed through extensive field experience to ensure a predictable and reliable transition from SmartZone or vSmartZone to RUCKUS One.

RUCKUS experts will provide:

- Data collection and review of the current network design
- Capture existing SmartZone / vSmartZone configuration and cluster architecture
- Capture addressing, VLAN design, SSID usage, AP zoning, reporting, and security policies
- Validate SmartZone to RUCKUS One feature compatibility
- Create a detailed migration method of procedure (MOP)
- Replicate the existing SmartZone configuration within the RUCKUS One environment
- Migration assistance as APs are moved to the RUCKUS One production environment
- Validation of functionality from both controller and AP perspectives
- Knowledge transfer session for operational teams

SERVICE TIERS

RUCKUS Professional Services offers standardized service tiers based on the number of access points being migrated from SmartZone / vSmartZone to RUCKUS One.

SKU	DESCRIPTION	LONG DESCRIPTION/OUTLINE
905-PRO1-R1MIGR1	RPS; RMT RUCKUS One Migration Service T1	RUCKUS Pro Services RUCKUS One (R1) Migration Service Tier-1. PS will migrate an existing SZ/vSZ configuration and first 50 APs to a new or existing RUCKUS R1. Support for 1 AP migration maintenance window. Remotely delivered.
905-PRO1-R1MIGR2	RPS; RMT RUCKUS One Migration Service T2	RUCKUS Pro Services RUCKUS One (R1) Migration Service Tier-2. PS will migrate an existing SZ/vSZ configuration and up to 500 APs to a new or existing RUCKUS R1. Support for 2 AP migration maintenance windows. Remotely delivered.
905-PRO1-R1MIGR3	RPS; RMT RUCKUS One Migration Service T3	RUCKUS Pro Services RUCKUS One (R1) Migration Service Tier-3. PS will migrate an existing SZ/vSZ configuration and up to 1000 APs to a new or existing RUCKUS R1. Support for 3 AP migration maintenance windows. Remotely delivered.

SERVICE REQUIREMENTS

• SmartZone version 6.1.2 or later
• SmartZone to RUCKUS One feature compatibility confirmed prior to migration
• Customer participation in scheduled AP migration maintenance windows
• Remote delivery by RUCKUS Professional Services engineers
• Networks with >1000 APs requires a custom SOW
